SUBJECT INDEX

Acceptability
  of alcoholic beverages in marketing context 173
  of Frankfurters containing surimi 277
  of surface salt levels on paté 333
Acetone extraction of ginger root 589
Acid-catalysed de-esterification of pectin 479
Albacore, frozen, stability of lipids on cooking 341
Alcoholic beverages, perceptual space using repertory grid 173
Aldehydes of phospholipids of veal meat, effect of heat 529
Ammonolysis of apple pectin 261
Anthocyanin stability in blue grape juice 321
Apple pectin, reaction with ammonia 261
Apple sauce, effect of fruit variables on particle size 403

Bagasse, waste utilization as dietary fibre for food 669
Banana pulp colour measurement 553
Bananas, textural changes and colour on ripening 217
Basic biopolymers, foam-enhancing properties 121
Beancurds (soy), replaced by chickpea, cowpea, mungbean, peanut 385
Beans, factors effecting hard-to-cook properties 535
Beef, reformed, methyl cellulose as binder 461
Beef sides, hot water decontamination 291, 305
Berry fruit juices, enzymic induced loss of sucrose 521
BET isotherm for water sorption by raffinose 629
Blackberry juice, enzyme induced loss of sucrose 521
Blanching and freezing of plantain and yam, sensory changes 195
Blanching, starch gelatinization temperature in potato 487
Bleaching clays for palm oil, effect of Fe content 647
Blue grape juice, stability of anthocyanins 321
Botulus spp., nitrogen factors for protein content 207

Cajanus cajan L, effect of bicarbonate soaking on dhal 237
Canned fish, comparison of methods for water activity 233
Cassava mash, physical properties and starch gelatinization 637
Cassava/wheat flour, total cyanide levels in bread 361
Cheese, goat's milk, microbiology of 147
Chenopodium quinoa, enzyme activities 543
Chicken
  ballotine *sous vide* preparation and chilled storage 199
  carcase decontamination, sensory quality after 11
  drumsticks, irradiated, detection by ESR 447
  meat texture, effect of post-mortem treatments 81
Chickpea
  substitute for soybean curds 385
  germinated, fortified flour and bread 103
Chicory, soft-rot in ready-to-use salads 47
Chitosan, foaming properites 121

Cholesterol, effect on encapsulated enzyme in vesicles 451
Clams—methods for shucking 659
Clays for bleaching palm oil 647
Cluster analysis of sorbed water molecule distribution 629
Cod mince/cod surimi, comparison of properties of gels 93
Colour changes and texture in ripening bananas 217
Colour measurement of banana pulp 553
Conference pears, isoperoxidases, regeneration of activity 269
Contextural acceptability of alcoholic beverages 173
Cook–chill shelf-life
  chicken ballotine, 199
  roast port 59
Cowpea
  substitute for soybean curds 385
  malted, as weaning food 511
Cryogenic food freezing, heat transfer model 243
Crystalline raffinose, water sorption by inverse GC 629
Curds from chickpea, cowpea, mungbean, peanut 385
Cultivar (apple), effect on sauce texture 403
Cyanide-total levels in wheat/cassava flour bread 361
Cysteine protease activity of thaumatin preparations 619

Dairy products, measurement of high water activities 139
Deacidification of passion fruit juice 395
Decontamination
  of broiler carcasses with lactic acid 11
  of sides of beef with hot water 291, 305
De-esterification of pectin, acid catalysed, kinetics 479
Dehusking efficiency of pigeon pea 237
Dense media for shrimp-meat separation 211
Density of cassava mash 637
Dhal, effect of bicarbonate soaking on composition 237
Diffusivity of moisture in potato crisp frying 183
Discorea spp., frozen, effects on sensory properties 195
Dried distiller grain flour blends for extrusion 323

Edible mushroom, protein nitrogen factor for 207
Enzyme activities
  of quinoa flour 543
  regeneration of 269, 613
  thaumatin preparations 619
Enzyme encapsulation 451
Enzyme induced loss of sucrose in berry fruits 521
ESR detection of irradiated chicken 447
Esterase activity of thaumatin 619
Extraction models
  for protein from lupin seed 17, 29
  for ginger root 589
Extrusion of dried distillers grain flour blends 323

Extrusion to pasteurize whey isolate without damage 601

Farmed rainbow trout, effect of slaughter method on quality 69
Fat oxidation in foods, improved distillation method 153
Fatty acids/aldehydes in cooked veal, effect of heat 529
Fatty acids, composition
  of cooked frozen albacore 341
  of frozen marine catfish 653
Fermented fluted pumpkin seeds, microbiology of 189
Fibre optic reflectance spectroscopy of mutton 503
Fish cakes, utilization of stunted tilapia 567
Fish silage from stunted tilapia 567
Fluted pumpkin seeds, fermentation of 189
Foam-enhancing properties of basic polymers 121
Foam inhibition of basic proteins 121
Frankfurter formulation with hake surimi 277
Freezing with liquid nitrogen, heat transfer model 243
Frozen albacore, stability of lipids after cooking 341
Frozen storage
  of marine catfish 653
  of plantain and yam 195
Fructose syrup, very enriched, continuous production 429
Fruit juice, loss of sucrose 521
Fruit maturity, cultivar, anatomy, influence on apple sauce 403

GAB isotherm for water sorption of raffinose 637
β-Galactosidase, encapsulation and release from vesicles 451
Gari, preparation and drying 637
Gas chromatography, inverse, for water sorption measurement 629
Gel electrophoresis, improved method for thaumatin 619
Gel permeation chromatography of whey protein isolates 601
Gelling properties of whey protein 601
Gels, properties of, from cod surimi 93
Generalized Procrustes analysis of alcoholic beverages 173
Ginger oleoresin 589
Ginger rhizome, kinetic extraction studies with acetone 589
[6]-Gingerol 589
Glucose, conversion to ethanol in immobilized cell reactor 429
Glucose–fructose mixture conversion to fructose syrup 429
Goat's milk cheese, Majorero, microbiology of 147
Grape isoperoxidases, heat stability 613
Gravimetric measurement of high a_w, improved method 139

Hake, *Merluccius* surimi, in Frankfurters 277
Hard-to-cook effect in beans, growing location/hardening 535
Heat stability of peroxidase isoenzymes in Ohane grapes 613
Heat transfer model in liquid nitrogen freezing 243
Hexanal formation in cook–chill roast pork 59
Hydrochloric acid extractability of minerals of pearl millet 327

Hygrometric measurement of water activity in canned fish 233

Immobilized cell reactor for high fructose syrup production 429
Intermediate moisture product from shrimp meat 211
Internal reflectance spectroscopy of meat, temperature effect 503
Inverse gas chromatography for water sorption 629
Ion-exchange deacidification of passion fruit juice 395
Ionically bound peroxidases 269, 613
Irradiated food detection by ESR 447
Isoenzyme composition of peroxidases in Ohane grapes 613
Isoperoxidases in Conference pears 269

Kinetics
  of de-esterification of pectin 479
  of thiamine loss 1
  of acetone extraction of ginger root 589

Lactic acid
  bacteria 147, 327, 601
  treatment of fresh broiler chickens 11
β-Lactoglobulin pasteurization 601
Lard contaminated by tallow, detection by DSC 415
Linamarase for cyanide assay 361
Lipid stability
  of cooked frozen albacore 341
  of frozen marine catfish 653
Lipoxygenase-free full-fat soyflour, storage stability 559
Liquid nitrogen freezing, heat transfer model 243
Loganberry juice, enzyme induced loss of sucrose 521
Low moisture extrusion cooking for powder pasteurization 601
Lupinus albus seed, protein extraction 17, 29

Mackerel, methods of a_W measurement 233
Majorero, goat's milk cheese, microbiology 147
Manihot esculenta
  mash, cooking and drying 637
  wheat flour bread, cyanide levels 361
Marine catfish, changes in lipids on frozen storage 653
Mayonnaise, sodium reduction by substitution 367
Meat particle size distribution, grinding temperature effect 421
Meat, reformed, methyl cellulose as binder 461
Meat separation using selective dense media 211
Metal ion content of Greek wines 39
Methyl cellulose as binder for reformed meat 461
Microcrystalline celluose, pre-drying effects on water sorption 163
Mineral availability in germinated, fermented pearl millet 327
Modelling extraction
  of ginger 589
  of protein 17

Modelling moisture loss in potato slice frying 183
Modelling thiamine loss in high a_W foods 1
Mungbean, substitute for soybean curds 385
Musa spp.
  frozen, effect of pretreatment on sensory quality 195
  pulp colour measurement 553
  texture and skin colour in ripening 217

Objective measurement of banana pulp colour 553
Ogiri, fermented fluted pumpkin condiment 189
Ohane grapes, peroxidase composition and stability 613
Oleoresin extraction from ginger root 589

Palm oil processing, bleaching clays for 647
Passion fruit juice deacidification 395
Pasteurization
  of heat-sensitive powders by extrusion 601
  of beef carcasses 291, 305
  of fresh chicken surfaces 11
Paté, perceived saltiness of different salt surface coatings 333
Peanuts as substitute for soybean curd 385
Pearl millet, germination, fermentation and soluble minerals 327
Pectins
  ammonolysis, de-esterification 261, 479
  satsuma waste 439
Pennisetum typhodeum, germination, fermentation 327
Peroxidases
  heat stability, regeneration 269, 613
  ionically bound/soluble isoenzymes 269, 613
Phaseolus vulgaricus, hard-to-cook factors 535
Phospholipid, veal, effect of heat 529
Phospholipid vesicles for enzyme encapsulation 451
Pickled quail eggs, packaging/storage effects on shelf-life 283
Pigeon pea, effect of bicarbonate soaking on dehusking 237
Plaintain and yam, effect of pretreatment on sensory quality 195
Pork, roast, shelf-life of cook–chilled 59
Potato slice/crisp/chip frying, moisture loss model 183
Potato-based protein snacks 665
Powder pasteurization using low-moisture extrusion 601
Precooked chilled roast pork, shelf-life 59
Pre-drying temperature and sorption on micro-crystalline cellulose 163
Protein
  basic, foam-enhancing properties 121
  denaturation in frozen catfish 653
  extraction from Lupin seeds
    mechanisms, models 17, 29
    microstructure 29
  in edible mushroom, *Boletus* spp., nitrogen factor 207
  sweetener 619

Protein-rich food supplements 495, 665
Proteolytic inhibitor E64 619
Proximity equilibration cell method for a_W 139
Pseudomonads in ready-to-use salads 47
Psychrometric measurement of a_W in canned fish 233

Quail eggs, pickled, packaging/storage effects on shelf-life 283
Quinoa flour, enzyme activities in 543

Raffinose, crystalline, water interactions with 629
Rainbow trout, effect of slaughter method on stored quality 69
Rancidity, improved TBA method 153
Raspberry juice, enzyme induced loss of sucrose 521
Reaction rate coefficients 573, 574
Reformed beef
  methyl cellulose as binder 461
  temperature and particle size distribution 421
Repertory grid method for mapping attitudes to beverages 173
Rheological properties of germinated chickpea flour/bread 103
Rice bran–soy blends for protein-supplemented cookies 495
Ripening bananas, colour and texture 217
Roast pork, cook–chilled shelf-life 59

Salads, ready-to-use, soft-rot in 47
Salt
  Morton Lite or mineral to reduce sodium in mayonnaise 367
  preference levels on paté
  substitutes 367
  surface coating/grain-size effect on saltiness of paté 333
Sardine, comparison of methods for a_W measurement 233
Satsuma mandarin fruit waste, dietary fibre recovery 439
Sensory characteristics of germinated chickpea bread 103
Shelf-life
  of cook–chill roast pork 59
  of pickled quail eggs 283
  of ready-to-use salads 47
  of *sous-vide* chicken ballotine 199
Shrimp-meat, separation and intermediate moisture product 211
Shucking clams, methods for 659
Slaughter method and quality of stored rainbow trout 69
Solvent extraction of ginger root 589
Sorghum and cowpea, malted, as weaning food 511
Sorption isotherms, isosteres, models 163, 317, 629
Sous-vide preparation and shelf-life of chicken ballotine 199
Soybeans, pretreatment for protein-enriched snacks/gruel 665
Soyflour
  full-fat, storage stability and packaging 559
    lipoxygenase-free 559
  supplementation and quality of cooked noodles 111
Soy–rice bran blends in cookies 495

Starch gelatinization
in cassava mash 637
in potato during blanching 487
Streptococcus thermophilus as powder pasteurization indicator 601
Sucrose loss in berry fruit juices 521
Sugar cane residues as source of dietary fibre for foods 669
Sulphur dioxide, and stability of blue grape anthocyanins 321
Surimi (hake) in Frankfurters 277
Surimi (cod), gel properties, effect of washing 93

Tachysurus dussumieri changes on frozen storage 653
TBA test for fat oxidation, modification of 153
Telferia occidentalis, seed fermentation 189
Texture
changes in ripening bananas 217
of surimi gels 93
of turkey/chicken meat, post-mortem treatment effects 81
Thaumatin preparations
enzyme activities 619
purification 619
Thiamine degradation at high a_W 1
Thunnus dussumieri (albacore), lipid stability on cooking 341
Tilapia, stunted, utilization as fish cake and fish silage 567
Trout, rainbow, effect of slaughter method on stored quality 69
Tuna, methods to measure a_W 233
Turkey meat texture, effects of post-mortem treatments 81

Ultrafiltration for deacidification of passion fruit juice 395

Veal meat phospholipids, effect of heat 529
Vesicles, phospholipid, for enzyme encapsulation/controlled release 451
Video image analysis of meat particle distribution 421
Volatiles of cook–chill roast pork 59

Waste recovery from satsuma mandarin residues 439
Water activity
measurement, improved gravimetric method 139
of canned fish, comparison of methods 233
Water–raffinose interactions 629
Water sorption energy and diffusion in grains 317
Water sorption isotherms by inverse gas chromatography 629
Weaning food based on malted sorghum and cowpea 511
Wheat (aestivum, durum)/soyflour, effect on noodle quality 111
Wheat/cassava flours and bread 361
Wheat extruded blends with dried distillers grains 373
Whey protein, low moisture cooking to pasteurize 601
Wine, metal ion content 39

Yam and plantain, frozen, pretreatments and sensory quality 195

Zinger officinalis, kinetics of acetone extraction 589
